

Genomics of Personalized Medicine

This free session will provide an overview of the promise and challenge involved in implementing personalized medicine. It will highlight how recent technological advancements are driving fundamental changes in the way we think about health and wellness. Educators will learn how genetic data are generated and analyzed and how genomics can inform clinical decision-making. They will also hear about an on-going research study aimed at identifying the best practices for the delivery of genomic information in the clinic. The speaker will discuss findings that speak to the future of medicine. This Genomics for Teachers session will be led by Joseph Jarvis, PhD, Director of Genomic Risk Reporting at Coriell Institute for Medical Research.

Date: Tuesday, February 24, 2015

Time: 4:30 – 5:30 PM

Location: Singh Center for Nanotechnology, Room 313
University of Pennsylvania, 3205 Walnut Street, Philadelphia, PA 19104
